

Flevy's Business Documents Will Be Made Available through Leading Enterprise Excellence Platform EON (Released by Flevy.com)

(Manhattan) February 6, 2017 – Flevy (<http://flevy.com>) and P5G (pioneers of the Enterprise Excellence Platform EON) have finalized a partnership to distribute select Flevy documents in the EON software platform (<https://www.phase5group.com/>).

“We are excited to extend our business frameworks and Lean tools to EON’s customer base,” said David Tang, CEO of Flevy. “EON is a powerful and innovative software; and we strongly feel our frameworks and templates complement its existing capabilities to drive customers towards Enterprise and Operational Excellence.”

“This partnership is representative of P5G’s overall strategy of providing compelling and actionable content and business frameworks that our clients use to implement best practices and standardize business processes,” said Roger Price, CEO of P5G. “Flevy’s robust library of premium business documents and frameworks in the areas of strategy development, organizational change management, and operational excellence make for a great addition to EON®’s growing portfolio of implementation content.”

Existing Flevy documents are from Flevy’s subscription service, FlevyPro (<http://flevy.com/pro>). FlevyPro provides subscribers with a curated library of business frameworks, Lean Six Sigma templates, and other materials. The business frameworks, added weekly, cover a broad range of management disciplines—e.g. Strategy & Planning, Lean/OpEx/Process, Digital Transformation, Change Management, Organizational Design, HR/Talent, IT, and others. These methodologies are all based on the research of global consulting firms (including McKinsey, Accenture, and Deloitte) or renown business academic.

Private and public sector organizations have been using EON® for some time to deploy strategy and manage their enterprise improvement agenda, including both traditional project portfolio & lifecycle management and business process standardization. Now, through this partnership with Flevy, those organizations will receive access to dozens of new and highly valuable tools, templates, and other resources. “I’m excited to partner with Flevy,” said Brian Wilkins, P5G’s Vice President of Sales and Marketing. “They’ve built a tremendous library of actionable business documents that our clients will absolutely love.”

###

About Flevy

Flevy is the marketplace for premium business documents. Documents range from business strategy frameworks to financial models to PowerPoint templates. These business documents are of the same caliber as those produced by top tier management consulting firms, such as McKinsey, BCG, Bain, Accenture, and Deloitte. Most documents were developed by seasoned

executives and consultants with 20+ years of experience. Flevy was founded under the principle that companies waste a lot of time and money recreating the same foundational business documents. All organizations, from startups to large enterprises, can use Flevy, whether it's to jumpstart projects, to find reference or comparison materials, or just to learn. Individual business professionals can monetize their business documents by listing them on Flevy.

About P5G and EON

P5G is the brains behind EON®, a highly configurable and scalable Enterprise Excellence Platform that allows organizations to deploy and manage their enterprise strategy at all levels and across all functions by creating meaningful “parent-child” relationships based on their unique organizational structure, assigning ownership for those objectives, creating strategy-specific work plans, and generating a risk profile for each objective. EON® also makes it easy to explicitly link enterprise improvement initiatives to the strategy, manage those initiatives to completion, and track return on investment. One of EON’s® key differentiators is a feature set called “Heatmaps” that makes it possible for organizations to generate operational maturity models, assess maturity anywhere, and implement practical work plans to improve maturity. Clients use “Heatmaps” to drive operational excellence, ensure compliance, or standardize business processes.

EON® has generated tremendous market traction across multiple industries, including chemicals/petrochemicals, food & beverage, discrete parts manufacturing, medical devices, healthcare, and state government agencies.
